

A coalition dedicated to improving the policy landscape for cybersecurity in Asia.

WHO ARE WE?

The Coalition for Cybersecurity in APAC (CCAPAC) is a group of dedicated industry stakeholders who are working to positively shape the cybersecurity environment in Asia through policy analysis, engagement and capacity building.

Our members include Amazon Web Services, Becton Dickson, Cisco and Intel. Access Partnership, the world's leading public policy firm for technology, serves as the secretariat for CCAPAC.

WHY CHOOSE US?

Growing cybersecurity threats are pushing governments to take action. CCAPAC leverages its unique technical capability and established network to share our vision for regulation and policy.

WHAT WE DO?

Policy Analysis

We monitor and examine cyber policy developments across the region, and devise response strategy and tactics.

Engagement

We directly engage cyber officials to influence policy and regulation that impact markets.

Capacity Building

We develop knowledge products and organize workshops that raise awareness, enhance capabilities, and drive recognition of our members as trusted sources.

What We Provide

Deep Technical Capability

Our staff is well-versed in the technical issues around cybersecurity and understands how these dynamics intersect in policy environments.

Proven Record in Asia

We have contacts with governments across the region and a proven record of achieving client goals in bilateral and multilateral engagement.

Global Coverage

We are present at policy meetings around the world, enabling us bring lessons learned on cybersecurity in other regions to bear in APAC.

Workplan for 2020

- Develop thought leadership on Operational Technology & the Internet of Things.
- Engage the Vietnam Government in its role as the ASEAN chair to shape the broad regional approach to cybersecurity.
- Continue stakeholder mapping of Asia cyber officials and engage on national cyber policies in countries such as India or Indonesia.
- Insert CCAPAC into capacity building efforts for successful CERTs in the region, and work to harmonize regional policies within the ASEAN cyber centers, bilateral initiatives, and multilateral forums.
- Conduct engagement in multilateral forums such as APEC.
